

Hi, my name is André de Paula Terceiro.

I will speak of some of my history.

I am an informatics technical and electroelectronics technical since 2001 (I was a student in these courses in parallel).

In 2002 I was Cisco CCNA (photos in my profile in LinkedIn).

In 2004 I was a student in Fatec-SP, a public college in São Paulo.

After I graduated, I worked in a small agency named GritoAD with web technologies, like PHP. The agency was closed and one owner indicated me to Promosapiens, where I worked for 5 years.

In Promosapiens I worked with .NET, PHP (Wordpress, CakePHP etc), Web technologies like JavaScript, Arduino, Assembly (PIC) and AS3 (Adobe Flash), SVN and other technologies. Photos in my LinkedIn profile. Was a great experience. But, if it was a great experience, why I changed of work?

Well, in 2012 I was a student in Software Engineering in USJT. There I met Thiago Pelizoni, a great friend. And he told me about technologies he used, like Ruby and Rails. I wanted to grow and apply some concepts I learned in the course. It was not an easy decision, but I knew that I need to change of company.

Then I tried a test in Fundação Cásper Líbero and I passed in the test. There I worked for 6 years with technologies like Ruby (with Rails), PHP (ZF1, ZF2, Symfony, vanilla e.g.) Cordova, Node.JS, Selenium, Gettext, Git and tools of the ecosystem, like PHPUnit (PHP) and Rspec (Ruby).

In 2020 I worked in an agency named Swide. A quick job. The agency depended on a contract of a client and the client did not accept the conditions. There I worked with a proprietary PHP framework and technologies like Git and JavaScript.

And then I work until now in Riachuelo. A very big company where I work in a sector named CAC/COE. There I develop softwares like "Slack Bot" (a bot who automatically post a response of a doubt based on the text of the doubt and the previous responses of other threads) and I provide support to other teams do their job.

How André makes his job? Well, you can see (links to several platforms in <http://www.terceiro.com.br>):

- My responses of Katas in Codewars. I have responses to more than 600 problems there;
- My works/jobs in my profile in LinkedIn;
- My repositories in Github;
